Chair’s Name:   Department:

Please indicate the resources that you will provide to support the candidate’s research. Be specific as to amount of space, number and kind of staff, clinical and lab resources, and dollars you will make available to the scholar (this has an important impact on our funding decision).

I support this proposal for a career development award in learning health systems research and certify that if he/she is selected as a LHS K12 Scholar he/she will be able to devote at least **75% effort** to the program, including clinical, translational, and quality improvement research carried out in my department/institute.
