

LHS K12

Candidate's Statement (not to exceed 2 pages)

Using the five scholar selection criteria as subheadings and the suggested components noted below, summarize the strengths of your application.

Track record:

- Describe any previous training in clinical and translational research (e.g., TICR Summer Workshop, ATCR Certificate, MPH degree, etc.).
- Describe any previous training in implementation science (e.g., semester long or short courses)
- Give examples of opportunities you've had to engage in research (basic or clinical); describe your role in these projects.
- Give examples of opportunities you've had to engage in quality improvement projects?
- Highlight examples of your productivity (e.g., pursuing an original research question, analyzing data, and presenting or publishing your findings) and impact (e.g. sustainability of QI projects, dissemination). Describe grants and major honors/awards.

Research plan:

- State your long-term learning health systems research career goal(s), including the clinical problem(s) your research will address, and the potential impact your research will have on patient centered outcomes.
- Explain how conducting the research project proposed in this application will prepare you to compete successfully for an NIH grant, such as an R03, R21, or R01 and provide some scenarios for what that project would be.

Training plan:

- Explain what additional training you need to achieve your LHS research career development goals. Identify specific areas where you have deficiencies and describe how you will obtain additional training in each area. State explicitly the courses you will take.
- Describe the roles each of your mentors will play. Be specific, and cite examples from your proposed training or research plan whenever possible.

Resources:

- Comment on the resources (space, staff, clinical materials, funds, etc.) provided by your department and mentors, and their adequacy to your career development. Be specific as to amounts that will be available to you for doing research.

Career potential:

- Describe the faculty appointment you will have in July 2019, and your departmental role over the next 5 years.
- Comment on the leadership role you expect to play in your department in 5-10 years.
- Explain how you will benefit from the LHS K12 program and how it will contribute to your career in multidisciplinary clinical and translational research.
