Introduction to Implementation Science

Part 1: Defining Implementation Science

Adithya Cattamanchi, MD, MAS
Associate Professor of Medicine
Co-director of UCSF Implementation Science Training Program

THE LATEST RESEARCH SHOWS THAT
WE REALLY SHOULD DO SOMETHING
WITH ALL THIS RESEARCH

The evidence-practice gap

- Consistent failure to translate evidence into routine practice
 - 50% of patients do not receive recommended care
 - 30% of medical spending is on unnecessary care
- Optimizing patient care requires closing evidence-practice gap

Asch SM. NEJM 2006
Dartmouth Atlas of Healthcare

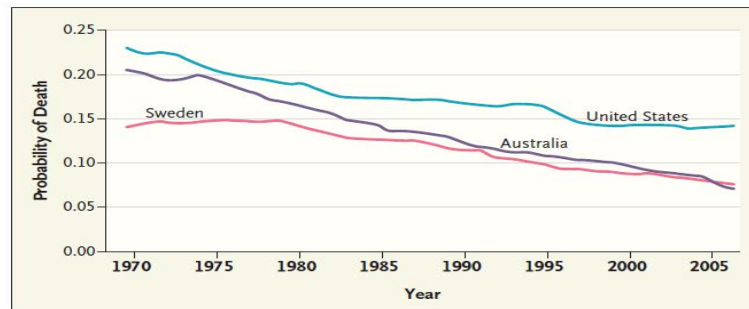

Spend so much...

Get so little...

World Health Rankings

- infant mortality 39th
- female mortality 43rd
- male mortality 42nd
- life expectancy 36th

Probability of Death for Boys and Men 15 to 60 Years of Age in Sweden, Australia, and the United States, 1970–2007.

Data are from the Australian Bureau of Statistics, the U.S. National Center for Health Statistics, and the World Health Organization.

Murray C et al. NEJM 2010

Traditional approach to implementation

ISLAGIATT
Principle

It Seemed Like
A Good Idea At
The Time

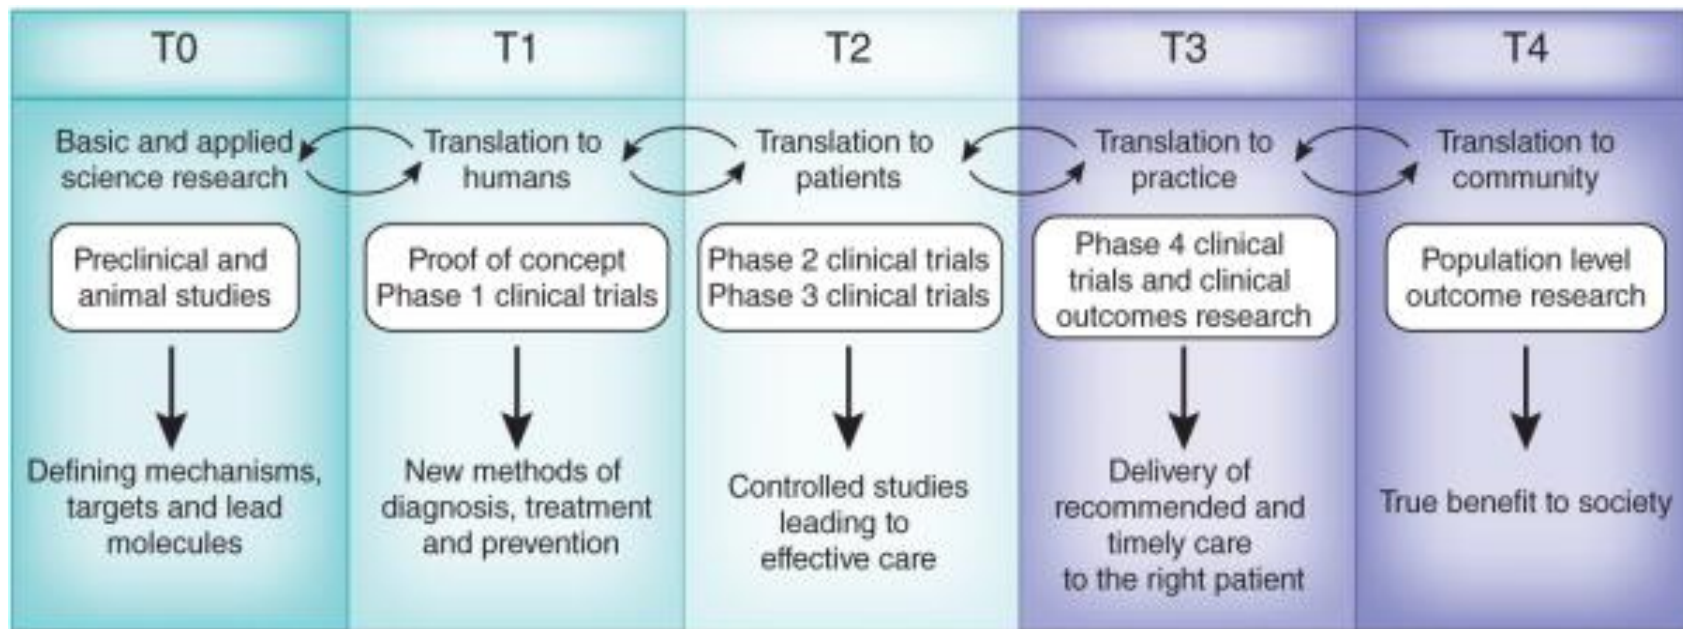

Martin Eccles

KEY PROBLEM – Does not identify or address factors critical for successful implementation

What are the consequences?

- New research takes **too long** to get adopted
- Interventions **not aligned** with priorities of patients/communities
- Providers lack **tools** to implement relevant and effective interventions
- **Variation** in effectiveness and/or uptake in different settings

Translational Research Pathways

Implementation Science

Implementation Science

- Study of **methods or strategies to promote** the systematic uptake of proven interventions into routine clinical practice. In this context, it includes the study of **influences** on the **behavior** of patients, providers, and organizations in either healthcare or population settings.

-- Implementation Science Journal

- Study of **methods to promote** the integration of research findings and evidence into healthcare **policy and practice**. It seeks to understand the **behavior** of healthcare professionals and other stakeholders as a key variable in the sustainable uptake, adoption, and implementation of evidence-based interventions

-- NIH Fogarty International Center

- Study of processes used in the implementation of initiatives and **contextual factors** that affect these initiatives. The basic intent is to understand not only what is and is not working, but **how and why** implementation is going right or wrong, and testing **approaches** to improve it.

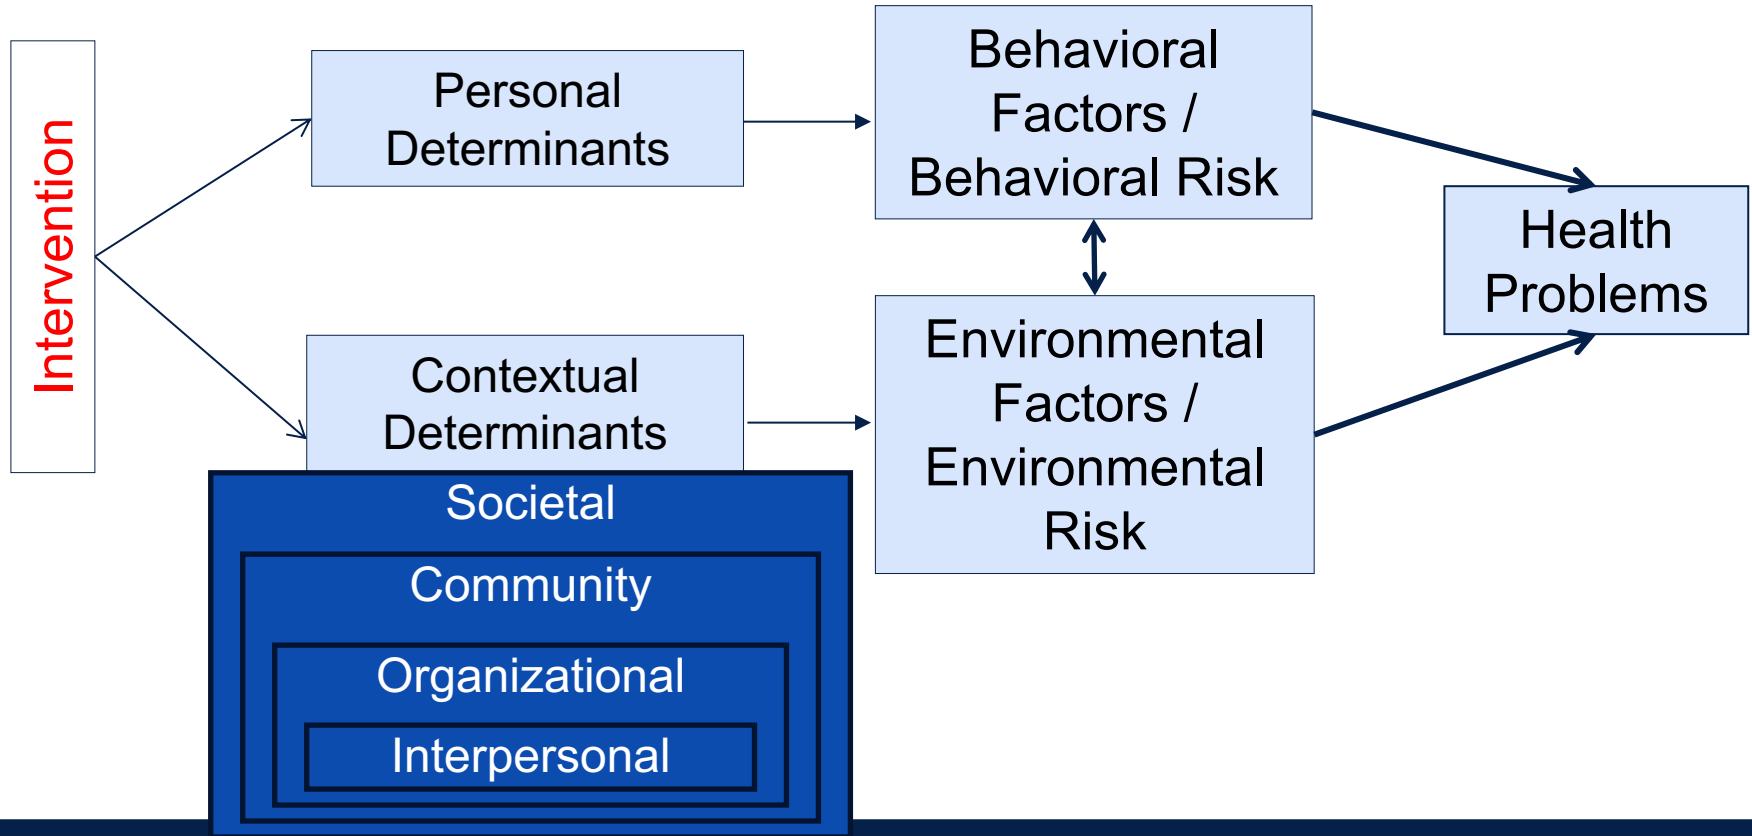

-- World Health Organization

Common themes across definitions

- Implementation science involves
 - Understanding behavior
 - Developing strategies to change behavior
 - Engaging stakeholders

Increase speed, quantity and quality of evidence uptake

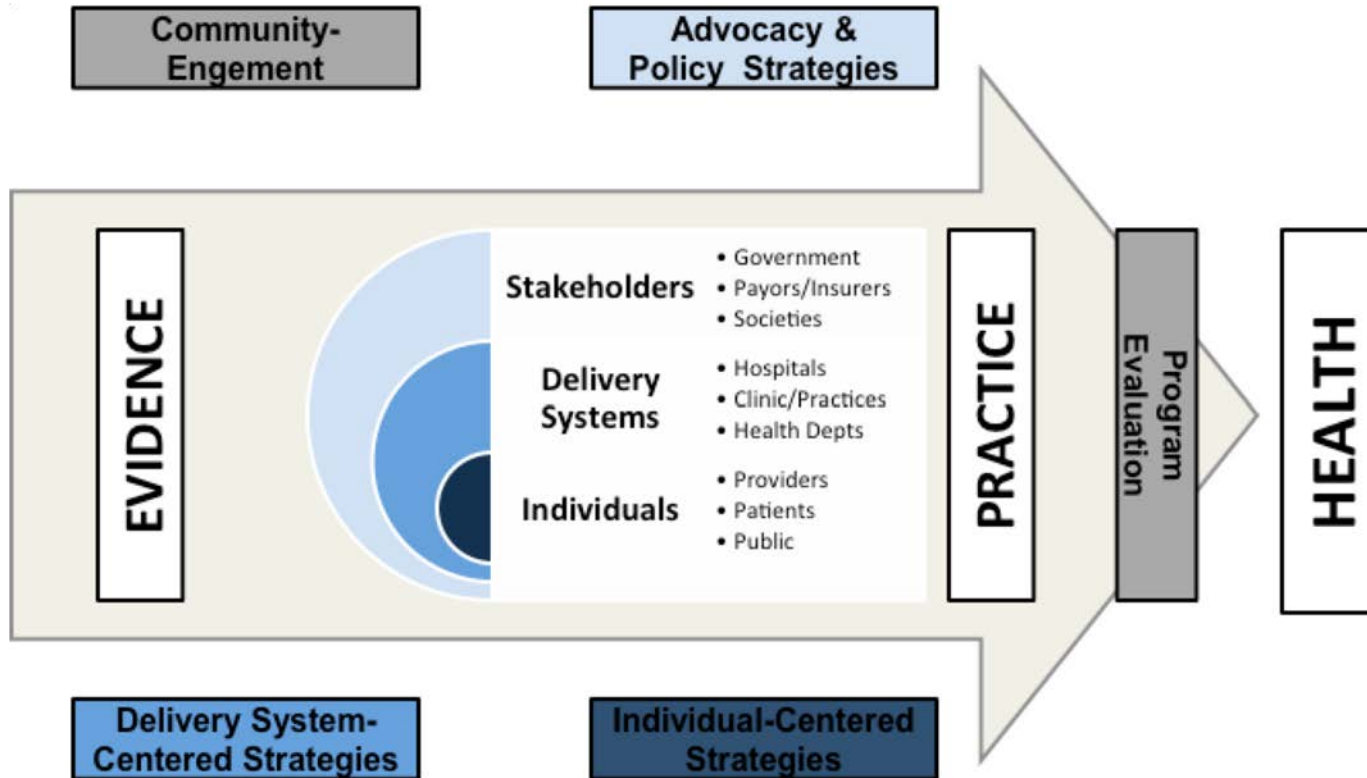

A focus on mechanisms of change

Use of theory/frameworks

- “Theory without empirical research is empty; empirical research without theory is blind” -- Immanuel Kant
1. Identify determinants of behavioral/environmental risk factors
 2. Create a causal model of the problem
 3. Specify determinants being targeted for change
 4. Select intervention methods to match targets
 5. Inform evaluation of implementation strategy

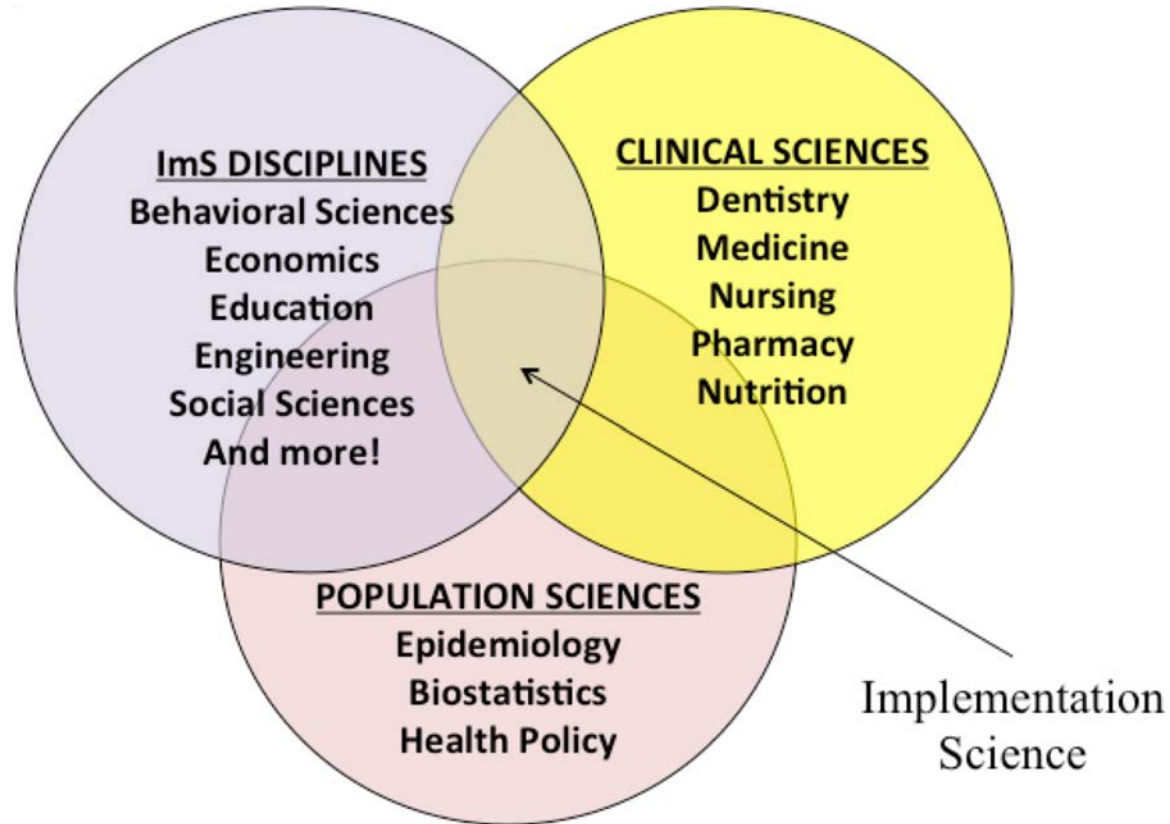

An ecological view of improving practice

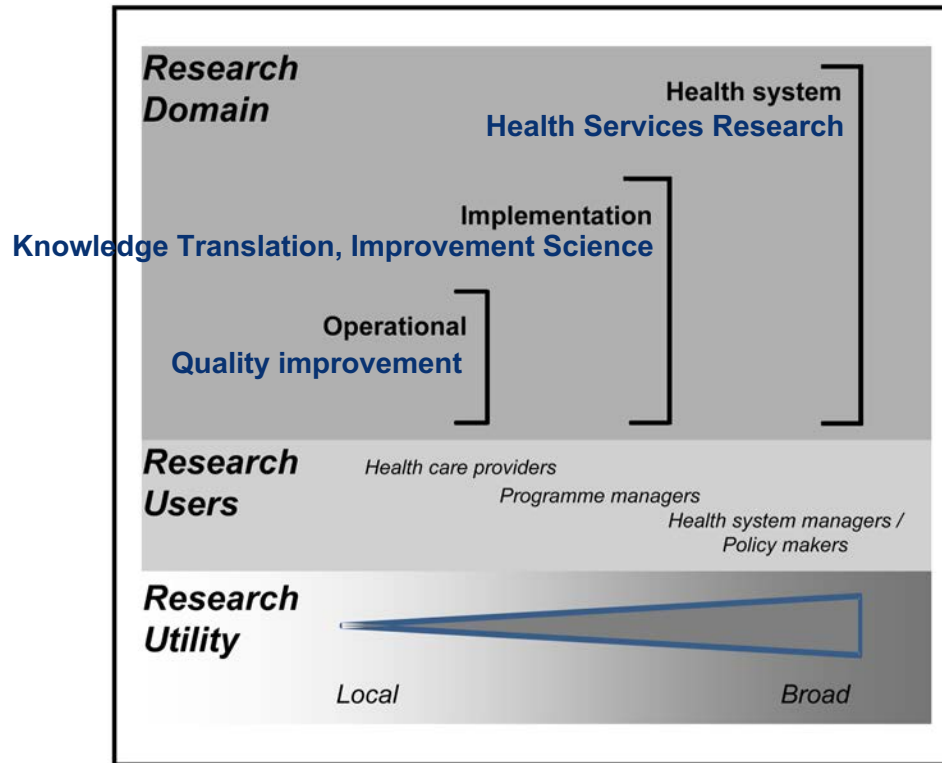

Types of implementation science research

- Identify barriers and facilitators to translation of evidence
- Develop strategies to improve healthcare delivery
- Evaluate impact of strategies to improve healthcare delivery
- Adapt interventions and implementation strategies to new settings
- Identify strategies to integrate evidence into policy/program decisions

Cutting-edge research

Implementation Science in context

Challenges facing implementation research

- **New and developing field**
 - Consensus emerging on optimal methodologies
- **Multi-disciplinary approach**
 - Coordination between stakeholders
 - Assembling relevant expertise
- **Causal inference and generalizability**
 - Fidelity vs. adaptation in real-world settings
 - Need for qualitative and quantitative methods
